Professional Experience

Promotion Support Services, Inc. — March 2016 to Present

Position: *Bilingual Transcriptionist*

Translating audio content from Spanish to English for various large companies to address the needs of their Spanish speaking customers.

- Transcribing commentaries from Spanish to English for a major health insurance company to address the concerns of their Spanish speaking customers.
- Transcribing address and location data in the US from Spanish to English of a major credit card company.
- Translating documents from English to Spanish for a local community organization for their community improvement programs.

Interactive Technologies Group, Inc. — December 2002 to August 2013

Position: *Senior Application Designer*

Lead visual designer at an information technologies company with a start-up environment that specializes in Management Engineering services for the private and government sectors. I successfully participated in various web application efforts as lead graphical user-interface designer and front-end developer. I oversaw the design of branding and marketing materials which included the use of the corporate logo, printed literature, and digital assets.

- Role: Front-end developer, user-interface designer. Development of a web application designed for company-wide time-tracking effort. The various tools of the application include timesheets, expenses, invoicing, and projects and tasks management. Tools and programs used include JavaScript, Java, Ajax, CSS, and Adobe Photoshop.
- Role: Front-end developer, user interface designer. The development of web applications and tools (J-Accomplish/JAWWS) designed to enhance the efficiency of complex organizations, particularly of the government sector, in their goals to outputting their overall best performance. Tools and programs used include JavaScript, Java, CSS, and Adobe Photoshop.
- Role: Front-end developer, user interface designer. Development of a web application designed for online registration and event planning. Its various tools include surveys, collaboration, reports, ticket printing, and electronic commerce capabilities. Designed user registration web sites to clients' own web site specifications for seamless operability. Designed and maintained the corporate and marketing web site. Participation involved client-side scripting, Java programming, as well as marketing materials.
- Role: User interface designer. Development of a web application designed to track clients/potential clients with substance abuse problems/tendencies through various processes for use at the University of Iowa Adolescent Health and Resource Center. Tools and software include XML, XSLT, and Adobe Photoshop.
- Role: Web designer, content manager, graphic designer. The design of marketing materials and collateral for branding efforts. This included print advertisements, business cards, brochures, display stands, as well as PowerPoint presentations. Designed, developed, and maintained the corporate web site according to brand specifications. Was responsible for management of content and digital assets. Planned and coordinated updates.

Compuware Corporation — June 2000 to April 2002

Position: *Senior Staff Analyst*

Consulted to Northwestern Mutual (NWM) insurance company as a *Visual Designer*.

- Converted several large intranet department web sites into their branding specifications and requirements, a standardization that spans across all their intranet and extranet sites.
- Designed graphical user-interfaces for web-based interactive applications and designed web sites for the company's intranet. Developed an internal site for the company's grant programs.
- Participated in usability testing, including paper-prototyping, for web-based applications and web sites. Participated in card-sorting exercises to determine categories and sections for certain web-based applications and web sites.
- Tools and software used for various projects at NWM include HTML, CSS, JavaScript, Adobe Photoshop, Adobe Illustrator, Adobe Dreamweaver, and various text editors for the Windows environment.
